

We are an Over The Road Trucking Company (OTR). Weather and traffiic information is vital to our operation. Having the ability to access instant traffic and weather info via XM Satellite Radio is a great advantage to our business. FM and AM signals are not always accessable over the vast areas we travel. Mostly only available in the larger metro areas.....never in the vast area of the Western US. XM satellite radio broadcast of traffic and weather could and may very well save lives and dollars, not to mention the fuel we are currently paying high prices for.

FREE INTERPRISE IS THE BACK BONE OF THIS NATION'S ECONOMY..
DON'T HINDER XM FROM PARTICIPATING IN FREE INTERPRISE.

WE STRONGLY OPPOSE HR4026!!!!!!!!!!!!!!
